

WORK EXPERIENCE**Air Canada - Digital Product Designer (Jan 2024 - Present)**

Role: Led end-to-end product design for enterprise-scale digital experiences across web and mobile, working cross-functionally with product, engineering, and design systems teams across Aeroplan, booking, and operational tools.

- Redesigned the eUpgrades experience for Aeroplan Elite members — modernizing a costly legacy system and introducing educational flows to improve benefit clarity and reduce call centre dependency.
- Led design strategy and direction for the Aeroplan Elite Status redesign — rethinking how hundreds of thousands of Elite members track progress, earn status, and select benefits through a gamified experience designed to drive repeated engagement and profitable behaviour.
- Designing an AI-first internal tool for in-terminal and below-wing agents to replace fragmented communication with shared real-time flight loading visibility — aimed at improving operational coordination and on-time departures.
- Ensured all design deliverables aligned with existing design systems, tokens, patterns, and layout standards to maintain consistency and streamline development.
- Identified opportunities for usability research and partnered with insights teams to plan and conduct testing, synthesizing findings into actionable design improvements.

Anyday Inc - UX Designer (June 2022 - June 2023)

- Designed data dashboards for the Canadian Chamber of Commerce, translating complex organizational data into clear, actionable interfaces.
- Designed a training and partner platform for the Canadian Chamber of Commerce, enabling small and medium sized enterprises access to consulting and training programs.
- Built a web presence for Saisei Ventures, a VC firm specializing in Japanese biotech — balancing credibility and clarity for a highly specialized audience.
- Designed an interactive web experience for AutoVerify, supporting automotive retail engagement across a multi-product platform.
- Built and maintained design systems to support consistency and scalability across multiple products.

Hppy Hour Digital - Web Designer (Nov 2021 - May 2022)

- Developed responsive web concepts and high-fidelity UI for a liquid-cooling computer hardware website.
- Managed ongoing maintenance and updates for multiple client websites using Webflow.
- Applied an existing design system to build scalable e-commerce product pages for an electric power sports vehicle brand.

Abilities to Work - Contract User Researcher (May 2021 - Nov 2021)

- Interviewed people with disabilities to understand their pain points when finding work.
- Collaborated with team members and internal stakeholders to workshop research findings.
- Assisted in designing an accessible web platform that enables individuals with disabilities to being their job search

SKILLS

Design: Figma, Adobe Creative Cloud, design systems, high-fidelity prototyping, information architecture, user flows

Research: Usability testing, user interviews, insight synthesis

Technical Fluency: HTML/CSS, APIs, MCP, Github

AI and Emerging Tools: Figma Make, ChatGPT, Copilot, Claude, Gemini, Cursor AI

EDUCATION

George Brown College

Bachelors of Digital Experience Design
